

### Last Week's Challenges

## New Research Question

One of the only measures being used to predict graduation rates are GPA, tests, disciplinary issues, attendance etc. using a tracking system called EWS (early warning system).

However, we know that household conditions significantly impact these indicators. This leads us to the question:

## What household conditions are the biggest indicators for graduation rates across school districts?

#### How does this differ across:

- ➤ Racial and ethnic groups?
- ➤ Regions?
- ➤ Household income groups?

#### Graduation Rates Data

R package from Urban Institute includes **Adjusted Cohort Graduation Rate** (ACGR) for school districts in US

- Originally each observation was a "cohort number" (# of members in a cohort)
- 10-12 cohorts in a district
- Weighted average of the Graduation Rates by the size of each cohort
- Weighted average by how many students were counted that year
- Joined by LEAID (state FIPS code and school district ID)

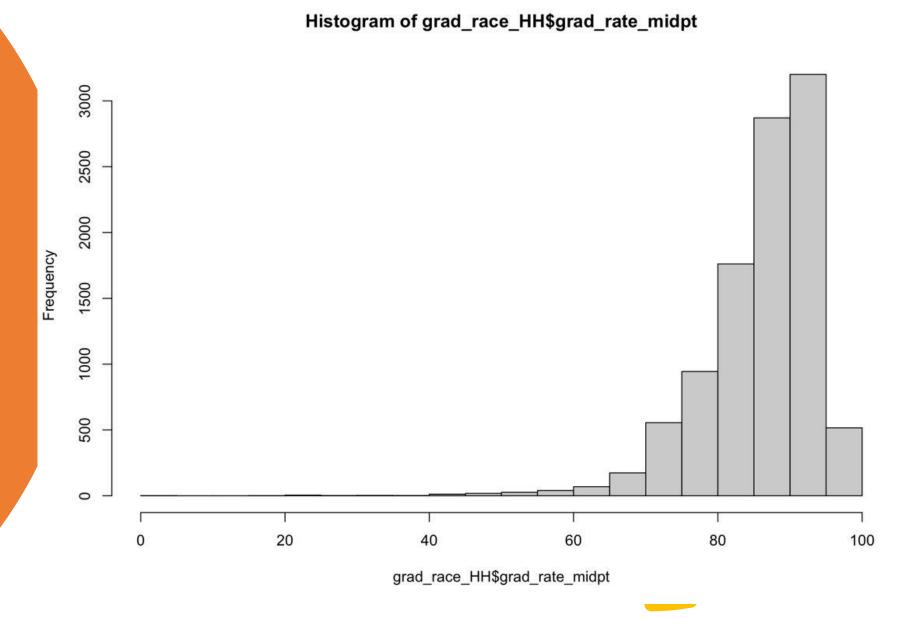

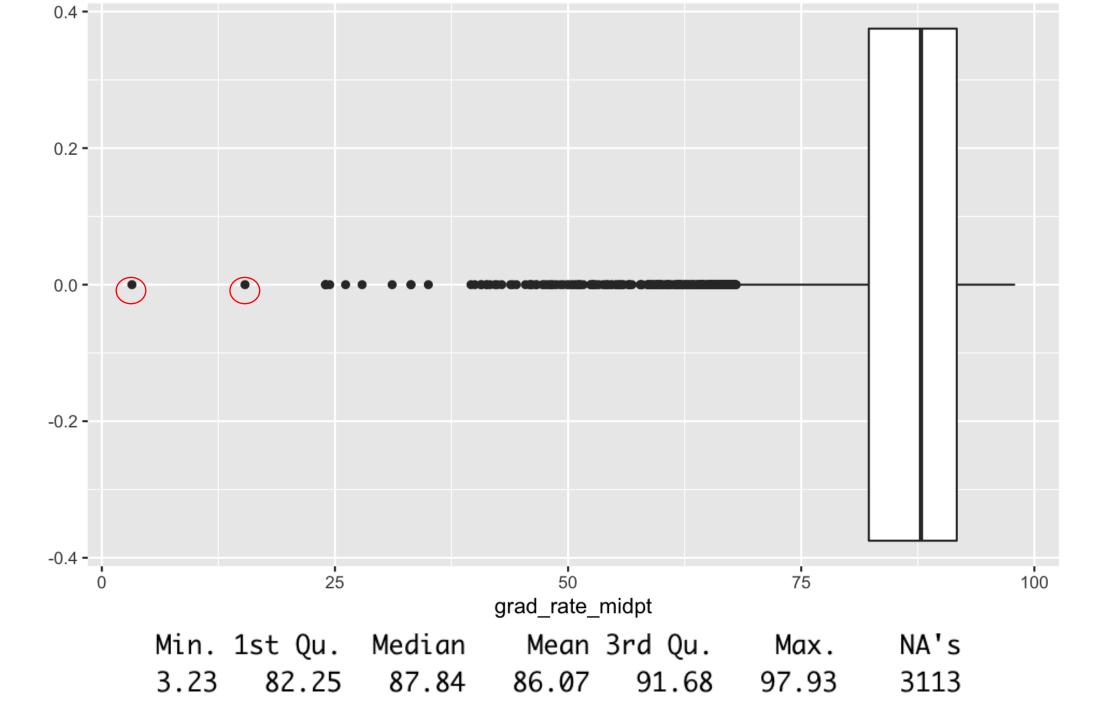

#### Table 4. Formula for Calculating the Four-Year Adjusted-Cohort Graduation Rate

Number of cohort members who earned a regular high school diploma by the end of SY 2017-18

Number of first-time 9th graders in fall 2014 (starting cohort) plus students who transferred in, minus students who transferred out, emigrated, or died during SY 2014-15, 2015-16, 2016-17, and 2017-18

## A Quick Look

### Interesting Outliers

## Shannon County School District 65-1 (South Dakota)

- ➤ Graduation Rate: 3.23%
- > Children: **3856**
- > % HH in poverty: **52**%
- ➤ % Single Parent HH: **69**%
- > % without comp/internet: 49%
- ➤ 90.7% Native American (On an Indian Reservation)

#### Hermosa Beach City Elementary School District

- ➤ Graduation Rate: **15.35**%
- > Faulty data?
- ➤ How did they manage to report graduation rates if there aren't any high schools to graduate from within this district?

### Correlations by region

#### 1. The whole US

2. The Bible Belt: Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Utah

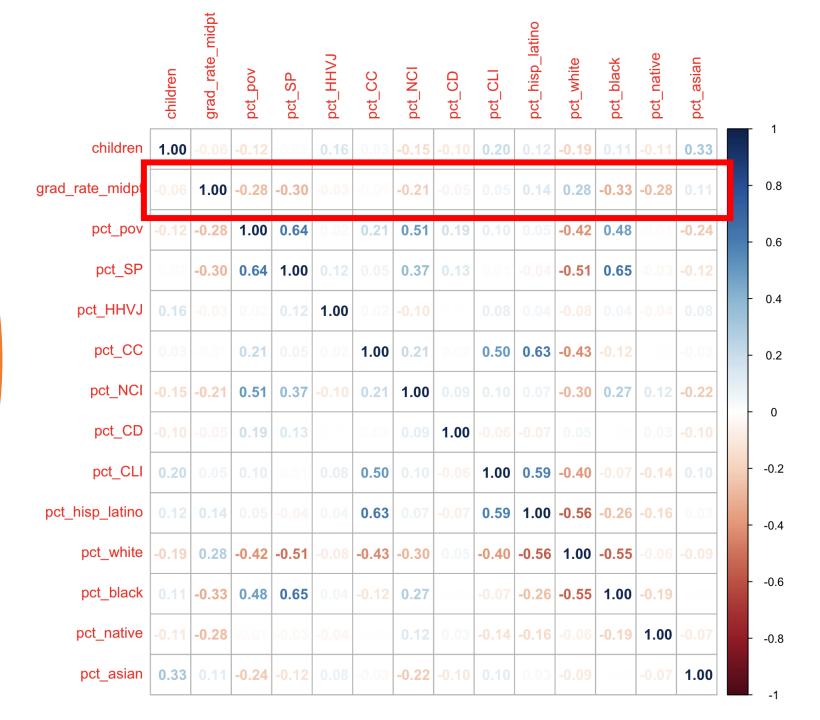

#### 3. States with the best and worst school systems:

- Based on metrics like safety, dropout rates, pupil-to-teacher ratio, bullyingincidence rate and testing scores in subjects like math and reading
- Ranked 1-5 ("best"): Massachusetts, Connecticut, New Jersey, Virginia, New Hampshire
- >Ranked 46-50 ("worst"): Alabama, Alaska, Arizona, Louisiana, New Mexico
